Response to Arguments

1. Applicant's arguments filed 11/2/2008 have been fully considered but they are not persuasive. Applicant states the assertions made in the office action on pages 3-4 that lead to a conclusion of obviousness are not explicit and the basic requirements of an articulated rationale under MPEP 2143 cannot be found. However, the previous office action states "It would have been obvious for one of ordinary skill in the art at the time of the invention to combine the IF conversion of Mostafa into the receiver of Seo. The RF to IF to base band converter is a substitution of the direct conversion and would eliminate the complexity found in the direct conversion. This would also reduce the cost of the receiver."

Applicant states the assertions made in the office action on pages 4-5 that lead to a conclusion of obviousness are not explicit and the basic requirements of an articulated rationale under MPEP 2143 cannot be found. However, the previous office action states "It would have been obvious for one of ordinary skill in the art at the time of the invention to combine the conventional discrete filter of Murakami into the system of the combination of Seo and Mostafa. Using a simple, conventional filter will reduce the cost and complexity at the receiver."

Applicant states the assertions made in the office action on page 6 that lead to a conclusion of obviousness are not explicit and the basic requirements of an articulated rationale under MPEP 2143 cannot be found. However, the previous office action states "It would have been obvious for one of ordinary skill in the art at the time of the invention to combine the conventional discrete filter of Murakami into the system of the

combination of Seo. Using a simple, conventional filter will reduce the cost and complexity at the receiver.”

2. The claims have been amended to overcome the previous rejections.

Allowable Subject Matter

Claims 1, 2, 5-19 and 22-24 are allowed.
